INTERNATIONAL JOURNAL OF MINERAL PROCESSING

VOLUME 51 NOS. 1–4 SPECIAL ISSUE

APPLICATION OF SURFACE SCIENCE TO ADVANCING FLOTATION TECHNOLOGY

Selected papers from the Engineering Foundation Conference, 11–16 August 1996, Naantali Spa Hotel, Naantali, Finland

Edited by:

EERO J. SUONINEN
Department of Applied Physics, University of Turku, Turku, Finland

K.S.E. FORSBERG
Division of Mineral Processing, Lulea University of Technology, Lulea, Sweden

and

A.N. BUCKLEY
Division of Coal and Energy Technology, CSIRO, Sydney, Australia

CONTENTS

Preface vii

Industrial needs of research in the field of flotation
G. Morizot ix

Sulphide mineral surfaces: theory and experiment
D.J. Vaughan, U. Becker and K. Wright 1

Chemisorption—the thermodynamically favoured process in the interaction of thiol collectors with sulphide minerals
A.N. Buckley and R. Woods 15

A surface study of a Boliden ore by TOF-LIMS
N.J. Bolin, S.L. Chryssoulis and C.J. Martin 27

Liberation and its role in flotation-based flowsheet development
G. Morizot, P. Conil, M.V. Durance and F. Gourram Badri 39

On characterization of pulp and froth in cells of flotation plant
A.J. Niemi, R. Ylinen and H. Hyötyniemi 51

Mixed collector systems in flotation
K. Hanumantha Rao and K.S.E. Forssberg 67

Use of surface complexation models in sulphide mineral flotation
W. Forsling and Z.-x. Sun 81

Different aspects of using electrochemical potential measurements in mineral processing
M. Ruonala, S. Heimala and S. Jounela 97

Recent contributions to the analysis of soluble salt flotation systems
J.D. Miller, S. Veeramasuneni and M.R. Yalamanchili 111
Flotation in inorganic electrolytes; the relationship between recover of hydrophobic particles, surface tension, bubble coalescence and gas solubility
R.J. Pugh, P. Weissenborn and O. Paulson 125
Role of hydrodynamic cavitation in fine particle flotation
Z.A. Zhou, Z. Xu, J.A. Finch, H. Hu and S.R. Rao 139
New methods in flotation research—application of synchrotron radiation to investigation of adsorbates on modified galena surfaces
R. Szargan, I. Uhlig, G. Wittstock and P. Roßbach 151
XPS and SR-XPS techniques applied to sulphide mineral surfaces
K. Laajalehto, I. Kartio and E. Suoninen 163
Predicting flotation rates using a rate equation derived from first principles
L. Mao and R.-H. Yoon 171
Elementary steps in particle–bubble attachment
A.V. Nguyen, H.J. Schulze and J. Ralston 183
Measurements of selectivity due to coalescence between two mineralized bubbles and characterization of MIBC action on froth flotation
F. Gourram-Badri, P. Conil and G. Morizot 197
5-methyl-2-mercaptobenzoxazole adsorbed on Cu_2S surface studied by synchrotron radiation excited photoemission
G. Contini, A.M. Marabini, V. Di Castro and G. Polzonetti 209
Surface characterization of pentlandite, $(Fe,Ni)_9S_8$, by X-ray photoelectron spectroscopy
D.L. Legrand, G.M. Bancroft and H.W. Nesbitt 217
Physicochemical mechanisms and ion flotation possibilities using columns for Cr^{6+} recovery from sulphuric solutions
L.O. Filippov, R. Houot and R. Joussemet 229
Rheological investigations of ultrafine galena particle slurries under flotation-related conditions
C.A. Prestidge 241
Selective flotation of gold from pyrite under oxidizing conditions
M.B.M. Monte, F.F. Lins and J.F. Oliveira 255
Shear flocculation and flotation of hematite using sodium oleate
R.D. Pascoe and E. Doherty 269
Infrared study of 2-mercaptobenzothiazole and two of its derivatives adsorbed on PbS
G. Contini, A. Ciccioli, C. Cozza, M. Barbaro and A.M. Marabini 283
Detection of elemental sulphur on galena oxidized in acidic solution
I. Kartio, G. Wittstock, K. Laajalehto, D. Hirsch, J. Simola, T. Laiho, R. Szargan and E. Suoninen 293
Verification by surface-enhanced Raman spectroscopy of the integrity of xanthate chemisorbed on silver
A.N. Buckley, T.J. Parks, A.M. Vassallo and R. Woods 303
